Jason (@open5588)

Senior / Staff .NET (C#), Enterprise ERP / WMS & Full-Stack Systems Architect
Taichung, Taiwan (UTC+8 · US / EU / APAC Overlap) · open5588@gmail.com · GitHub: github.com/open5588 · Portfolio: Live Portfolio

EXECUTIVE SUMMARY

Senior Full-Stack & Enterprise Systems Architect with **10+ years of core specialization in C# / .NET (.NET Framework 4.x to .NET 8 / .NET 9 / .NET 10 LTS), T-SQL / MS SQL Server, Enterprise ERP, Warehouse Management Systems (WMS), Trucking/Logistics platforms, and Multi-Tenant SaaS (`YMSaaS`)**. Proven track record leading zero-defect legacy ERP modernizations (WebForms to .NET 8/9/10 Web API + React 19), multi-warehouse distribution center (DC) automation across US and Asia operations, and high-performance cross-platform systems (`CelerCam` , `CelerCast` , `Skywave` , `Osprey`).

CORE TECHNICAL STACK

- **Primary Stack (.NET & Enterprise ERP/WMS):** C# (C# 12), .NET 8 / .NET 9 / .NET 10 LTS, ASP.NET Core Web API, ASP.NET WebForms & MVC Modernization, Entity Framework Core, Dapper, xUnit, MS SQL Server (T-SQL, Complex Query Tuning, Stored Procedure Migration), Multi-Tenant Database Isolation
- **Enterprise Domains:** ERP (Sales Analysis, Sales Order, Purchasing, Quotation, Financial Reconciliation), WMS (Inbound/Receiving, Inspection State Machines, Area/Bin/Slot Slotting, Transload, Outbound Picking/Packing, Barcode/QR Book Automation), Fleet & Container Tracking, Enterprise SSO / RBAC
- **Modern Web, SaaS & Mobile:** TypeScript, React 19, Next.js (App Router), MUI X DataGrid v8, NestJS, Prisma, MySQL, PostgreSQL, React Native (iOS/Android Warehouse PDA & Consumer Apps)
- **Systems, Media & Cloud Infrastructure:** Docker Swarm (Linux & Windows Containers), Nginx, AWS, GitHub Actions CI/CD, Rust, C++, Python (FastAPI), Swift, Kotlin, WebRTC / Native OBS Studio Plugins

ENTERPRISE ERP, WMS & .NET ARCHITECTURE EXPERIENCE

Principal ERP / WMS & Multi-Tenant SaaS Architect (YMSaaS & Enterprise .NET Suite)

2016 – Present

- **YMSaaS — Multi-Tenant Cloud WMS & ERP Platform (`NestJS` + `Next.js` + `Prisma` + `MySQL` + `React Native`):** Architected a full-scale multi-tenant SaaS rewrite replacing a legacy `ASP.NET WebForms` WMS (`YMSystem.sln`) with dynamic per-tenant database routing (`TenantPrismaService`). Delivered complete ERP/WMS parity across **Inventory Management** (4-layer stock defense & audit trail), **Purchase Orders**, **Automated Receiving & Inspection State Machine** (auto-closing POs), **3-Tier Nested Logistics Tracking** (Master/Sub/Parcel), **Outbound Picking/Packing**, **Quotation & Tax/Freight Engine**, and a companion **React Native WMS Mobile App (`WmsApp`)**.
- **Enterprise ERP Modernization — Legacy .NET 4.8 WebForms to .NET 8 Web API + React:** Rebuilt core **Sales Analysis (SA)**, **Inventory**, and **Sales Order (SO)** ERP modules in **.NET 8 Web API (C# 12) + T-SQL + React (Vite)**. Built a deterministic **Oracle Golden Verification Harness** (`145/145` xUnit & E2E tests passing) guaranteeing 100% row-by-row, column-by-column financial parity against the legacy production ERP database.
- **Enterprise Single Sign-On & Identity Control Plane (`.NET 9 Web API` + `React 19` + `MUI 9`):** Engineered a centralized `.NET 9` SSO and RBAC authorization platform unifying identity across multiple internal ERP and WMS portals with non-destructive schema migration (`29/29` xUnit integration tests).

- **Cloud-Native .NET 10 Microservice Migration (AWS Linux Docker Swarm):** Ported enterprise order/notification bot services from Windows IIS (`.NET Framework 4.6.2`) to **.NET 10 LTS** running on a multi-node Linux Docker Swarm cluster with Microsoft Graph API integration.
- **Warehouse DC Automation, Trucking ERP & Hardware Integration (`C# / .NET` + `SQL Server` + `React 19`):** Built **WMSLocationImporter** & **WMSQrBook** (`C#`) for automated Excel-to-WMS DB slotting (`Area/Bin/Slot`), New DC Creation Wizards, and one-click Rack/OpenArea QR Book PDF generation; engineered **Trucking & Container Tracking ERP (`C#`)**, **Transload WMS UI (`React 19` + `MUI X DataGrid`)**, and **PunchHub (`FastAPI`)** multi-site RFID/biometric attendance hardware receivers.

INDEPENDENT SHIPPED PRODUCTS & OPEN-SOURCE ENGINEERING (@OPEN5588)

- **CelerCam (celercam.com) & CelerCast (celercast.celercam.com):** Sub-18ms wireless phone-to-OBS Studio camera pipeline (`C++` , `Rust` , `Kotlin` , `Swift` , native macOS `.dmg` & Windows `.msi` installers) and multi-room 4K AV broadcast control plane (`v0.4.4`).
- **Skywave (skywavedesk.com) & Osprey SMS (osprey-sms.pages.dev):** 60fps zero-trust remote desktop client/host suite and open-source Android Dual-SIM SMS webhook gateway (github.com/open5588/Osprey).
- **Open-Source Upstream PRs:** `permitio/opal#970` , `onyx-dot-app/onyx#16064` , `gyroflow/gyroflow#1258` , `getdozer/dozer#2531-2533` , `tenstorrent/tt-metal#60721` , `zio/zio#11285` , and 23 architectural proposals on `Expensify/App` .
